Agung Podomoro Land (APLN)

At a hefty discount for a reason

We met APLN's management yesterday and they informed us that the deal to sell Pullman Hotel Central Park would be settled this month. With the deal worth IDR1.3tn and the hotel having book value of IDR363.2bn, the company should book a one-off gain of IDR930bn in 3Q17. In our desktop valuation, we arrive at NAV per share for APLN of IDR823. Using this NAV, APLN currently trades at a hefty 71.8% discount.

The deal to sell Pullman Hotel Central Park should be closed this month

On 23 February 2017, APLN signed a Binding Investment Agreement with Strategic Property Investors Company Limited to sell Pullman Jakarta Central Park. The transaction should reach IDR1.3tn, or inline with the independent appraiser's valuation. The deal is expected to be completed this month. Given that the hotel's book value is IDR363.2bn, we expect the company to book a one-off gain of IDR930bn in 3Q17 (higher than the net profit recorded in 2016 of IDR631.9bn).

Reclamation projects: construction may continue in April 2018 at the earliest

Recall that APLN's reclamation projects were halted due to the lawsuit served by Yayasan Wahana Lingkungan Hidup (WALHI) and the administrative sanctions imposed by the Indonesian Ministry of Environment and Forestry. Although the Supreme Court has since rejected WALHI's appeal, the company is still awaiting the decision by the new governor of Jakarta before it proceeds with the project. If approval is given, the company hopes that reclamation can resume in April 2018 at the earliest given that six months will be needed for the mobilization of the necessary ships. By June 2016, APLN had spent IDR2.5tn on the reclamation of Island G and IDR479.1bn on the reclamation of Island I.

Two projects to be launched in 2H17

No project launches were conducted by APLN in 1H17. Even so, APLN still managed to record marketing sales of IDR2.4tn in 1H17 (+54.6%yoy), thanks largely to industrial land sales of IDR1.4tn to China Fortune Development. Going into 2H17, APLN plans to launch two new projects: a landed residential project in Taruma City, Karawang, and a condominium in Orchard View, Batam. Supported by these new projects and also from its existing projects, APLN expects to record marketing sales of IDR3.0tn in 2017, or growth of 10.0%yoy.

Valuation: a hefty discount

Using a back-of-the-envelope calculation, we arrive at NAV for APLN of IDR823/share (SOTP based valuation and WACC assumption of 11.0% and Terminal Growth of 4.0%). Based on this indicative NAV, APLN currently trades at a hefty 71.8% discount. We believe the reason that APLN has a higher discount than its peers is due to the overhang in relation to its reclamation projects.

FLASH NOTES

United Tractors: Sales to the mining sector remained strong in July 2017

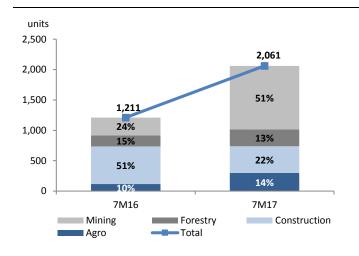

(UNTR IJ. IDR29,500. BUY. TP IDR30,000)

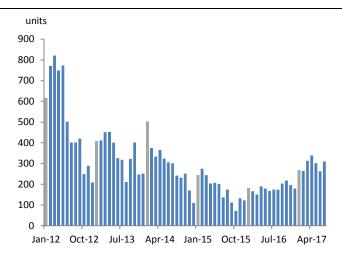

United Tractors (UNTR) reported Komatsu sales volume of 310 units in July 2017 (+17.9% mom, +77.1% yoy), supported by strong sales to the forestry and agri sectors. Monthly sales to the mining sector were flattish.

- Firm commodity prices gave a boost to Komatsu sales. Rising commodity prices, especially of coal, helped lift Komatsu sales to the mining sector by 257% yoy to 1,046 units in 7M17. Coupled with better sales to the agri sector (+156% yoy) and forestry sector (+52% yoy), Komatsu sales jumped 70.2% yoy to 2,061 units in 7M17. By contrast, however, sales to the construction sector declined by 28.7% yoy. With the sales figures above the management's new guidance of 3,000 units for 2017, we believe there may be room for the management to revise up its Komatsu sales volume target for 2017.
- Higher coal production despite more rainy days. While coal operations in Kalimantan were adversely affected by bad weather, the coal production under Pamapersada Nusantara (Pama) nonetheless increased by 5.4% yoy to 62.4mn tonnes in 7M17. With overburden removal up by 8.6% yoy, the stripping ratio increased to 7.0x in 7M17 from 6.8x in 7M16.
- **Higher coal production as the weather improves.** With the coal production in 7M17 only reaching 54.6% of our full year forecast, we expect Pama to increase its coal production further to achieve its targets for Sept and Oct 2017 supported by better weather.
- Lower trading activities. Coal sales volume, meanwhile, posted a 17.5% yoy decline to 4.1mn tonnes in 7M17 owing to the company's lower coal trading activities as coalminers surrounding the company's mining area prefer to sell their coal directly.
- Maintain BUY with a Target Price of Rp30,000 based on DCF valuation (WACC of 12.4% and terminal growth of 3%) supported by stable coal prices which will help to boost the company's performance in 2H17. The downside risks are: a) a sharp decline in coal prices, b) tighter competition in the heavy equipment business and c) a strong IDR/USD. Our Target Price implies 17.3x 2017F PE.

Exhibit 1. Revival of Komatsu sales to the mining sector

Exhibit 2. Monthly Komatsu sales volume

MARKET NEWS

SECTOR

Banks: Credit restructuring rules will be tightened

The Financial Services Authority (OJK) will reportedly revoke the one pillar credit restructuring rules and move back to three pillars. This will mean more stringent regulation. According to OJK, the worst period for the banking sector is over meaning that more stringent regulation was appropriate. Under one pillar rules, during restructuring, banks only need to look at the likelihood of customers repaying the loan. (Bisnis Indonesia)

Plantations: Malaysia and Indonesia in talks to supply biodiesel to China

Malaysia and Indonesia are holding discussions to export palm-based biodiesel to China as that country is looking to implement the B5 biodiesel mandate in an effort to increase environmental controls. In addition, Malaysia is also looking to expand to new biodiesel markets such as India and the Philippines. (Bloomberg)

Comments: If China were to implement the B5 biodiesel mandate, it would create strong demand for edible oils as a source of fuel. This would be a positive for the oil & seeds sector, including CPO. With China's annual diesel usage estimated at 167mn KL, the B5 mandate would require 8.3mn KL of biodiesel to be blended, translating to around 7.2mn tons of additional CPO demand (assuming 100% use of palm-based biodiesel), roughly 10% of global CPO demand. (Yudha Gautama)

CORPORATE

Kimia Farma: KAEF plans to issue IDR1tn of MTN

Kimia Farma plans to issue IDR1tn of medium term notes (MTN). The money will be utilized for financing, inorganic initiatives and investment in production capacities. Last year, KAEF issued IDR300bn of MTN due in January 2018 with an 8.25% coupon rate. By the end of May 2017, construction of the company's new factory in Banjaran – West Java had reached 80%. The factory is expected to be completed in 2018. (Bisnis Indonesia)

Comments: The issuance of IDR1tn of MTN will push up the debt to equity ratio to 85% from 37% in 2016, leading to higher interest expenses. This may constrain the company's earnings. We maintain our Sell recommendation on the stock. (Natalia Sutanto)

Tower Bersama: Reports EBITDA of Rp1.68tn in 1H17 - inline

Tower Bersama (TBIG) reported 1H17 EBITDA of Rp1.68tn, in-line with expectations, or reaching 49% of consensus estimates. 1H17 revenues reached Rp1.94tn (+6.8% YoY), or 49% of consensus estimates, boosted by higher revenues from Telekomunikasi Selular. In 1H17, TBIG added 1,750 tenancies, of which 619 were telecommunication towers with the tenancy ratio improving to 1.68 (from 1.63 in 1H16). The company is raising its FY17 guidance for the organic addition of 2,700 tenants. As of the end of June 17, TBIG had 22,175 tenants and 13,210 telecommunication sites. (Company Release)

Wijaya Karya: Wika Gedung's IPO is targeted for 4Q17

Wijaya Karya (WIKA) targets the IPO for its subsidiary Wijaya Karya Bangunan Gedung (Wika Gedung) to take place in 4Q17. The IPO will be based on its financial statements as of June 17. Wika Gedung plans to sell a 30% to 35% stake to the general public through this IPO with targeted proceeds of IDR3.0tn to IDR3.5tn. All the proceeds will be used for expansion. Furthermore, another WIKA subsidiary, Wijaya Karya Realty (Wika Realty), plans to conduct an IPO next year. (Kontan)

Comment: WIKA has not yet released its June 17 financial statements since they are still being audited. Based on the targeted proceeds, Wika Gedung's equity value is estimated at around IDR10.0tn – IDR11.7tn. Wika Gedung's assets as of March 17 reached IDR2.2tn. (Maria Renata)
