

FROM EQUITY RESEARCH

Astra Agro Lestari: Decent Performance

(AALI IJ. IDR 13,975. HOLD. TP IDR 14,800) AALI booked 4Q17 net profits of Rp604.3bn(-30% YoY, +67% QoQ), resulting in FY17 net profits of Rp2.0tn (+0.2% YoY), reaching 105% of our estimate and 101% of the consensus. Looking ahead, we assume FFB production growth of 7% to FY15's level and more aggressive replanting due to AALI's ageing plantation profile. We fine tune our FY18/19 net profits estimates by 3%/-1% to Rp1.91tn/Rp1.90tn respectively. Maintain HOLD with a revised TP of Rp14,800.

Bank Negara Indonesia: Challenges loom

(BBNI IJ. IDR 9,825. BUY. TP IDR 10,400)

We reiterate our HOLD call on BBNI with a higher GGM-derived TP of IDR10,400 (implying 1.74x 2018F P/BV) as the current share price already prices in this year's outlook in our view. On a cautionary note, the bank's management has highlighted that its SOE corporate lending segment may face challenges from securities issuances following JSMR's recent Komodo bonds issuance. As such, we expect a NIM of 5.2% on the back of a 30bps fall in the assets yield to 7.8% and a 10bps drop in the blended CoF to 2.9%.

To see the full version of this report, please click here

Indo Tambangraya: Focus on organic expansion

(ITMG IJ. IDR 31,475. HOLD. TP IDR 33,200)

Indo Tambangraya Megah (ITMG) managed to increase its reserves organically by 38.9% yoy at the end of 2017 through further exploration and thanks to the impact of higher coal prices. We fine tune our model to incorporate: a) the higher reserves, and b) our higher coal price assumption. Maintain HOLD with a higher TP of IDR33,200 (based on mine-life DCF valuation with WACC of 11.9%). Our target price implies 9.6x 2018F PE.

To see the full version of this report, please click here

Matahari Department Store: Attractive valuation

(LPPF IJ. IDR 10,100. BUY. TP IDR 12,500)

LPPF's 4Q17 top and bottom line only grew by +4.3% yoy and -1.8% yoy, yet still within our expectation, which has been mainly affected by overall soft purchasing power in 2017 hampered particularly the mid-low segment in Indonesia. As the result, 4Q17 profitability decreased, reflected on lower 4Q17 gross and operating margin due to inefficiency in rental and salary expense during the year. On the positive note, balance sheet has remained healthy and the current valuation, we think, is too cheap to ignore. BUY! *To see the full version of this report, please* **click here**

Astra Agro Lestari(AALI IJ)

Decent Performance

AALI booked 4Q17 net profits of Rp604.3bn(-30% YoY, +67% QoQ), resulting in FY17 net profits of Rp2.0tn (+0.2% YoY), reaching 105% of our estimate and 101% of the consensus. Looking ahead, we assume FFB production growth of 7% to FY15's level and more aggressive replanting due to AALI's ageing plantation profile. We fine tune our FY18/19 net profits estimates by 3%/-1% to Rp1.91tn/Rp1.90tn respectively. Maintain HOLD with a revised TP of Rp14,800.

In-line FY17 result. AALI booked 4Q17 net profits of Rp604.3bn (-30% YoY, +67% QoQ), resulting in FY17 net profits of Rp2.0tn (+0.2% YoY), reaching 105% of our estimate and 101% of the consensus. The FY17 revenues are above expectations at Rp17.3tn, (+22.5% YoY), 109% of our estimate and 110% of the consensus, due to higher-than-expected CPO ASP (+6.5% YoY) and sales volume (+24.4% YoY). The FY17 CPO ASP was Rp8,271/kg (+6.5% YoY) while the COGS/kg reached Rp7,472/kg (+15.2% YoY). The FY17 CPO production and sales volume reached 1.63mn tons (+5.1% YoY) and 1.26mn tons (+24.4% YoY) respectively, while olein sales volume was 263.4k tons (-17.7% YoY).

FFB production guidance at FY15's level. We raise our FY18 FFB growth assumption to 7% (from 5%), implying FFB production at FY15's level, in-line with the company's guidance. As such, we forecast AALI's CPO production to reach 1.74mn tons in FY18 (+6.3% YoY). In addition, AALI is planning to construct a 45 ton/hr CPO mill in South Kalimantan, costing ~ Rp100-200bn, with completion expected by Jun/Jul-18.

More aggressive replanting. Owing to its ageing plantation profile, AALI is aiming to increase its rate of replanting to 5,000 Ha/annum (from 3,000 - 3,500 Ha/annum). As such, we have a replanting target of 5,000Ha in FY18, in-line with the company's more aggressive replanting program. In FY17, AALI managed to replant a total of 3,230 Ha.

Maintain HOLD with a revised TP of Rp14,800, based on 15.0x sector P/E (-0.5SD). Post the FY17 earnings, we fine tune our FY18/19 net profits forecast by 3%/-1% to Rp1.91tn/Rp1.90tn respectively. We expect lower net profits in FY18/19 on lower CPO ASP, slower volume growth and a rising cost of production. We maintain our CPO price assumptions of MYR2,700/ton in FY18/19. The counter is currently trading at 14.1x FY18 P/E.

Eka Savitri (62-21) 2955 5888 ext 3506 eka.savitri@danareksa.co.id

Bank Negara Indonesia(BBNI IJ)

Challenges loom

We reiterate our HOLD call on BBNI with a higher GGM-derived TP of IDR10,400 (implying 1.74x 2018F P/BV) as the current share price already prices in this year's outlook in our view. On a cautionary note, the bank's management has highlighted that its SOE corporate lending segment may face challenges from securities issuances following JSMR's recent Komodo bonds issuance. As such, we expect a NIM of 5.2% on the back of a 30bps fall in the assets yield to 7.8% and a 10bps drop in the blended CoF to 2.9%.

The bank's corporate segment may face challenges. BBNI's management emphasised that the bank would maintain its 50% loans exposure towards corporate lending, including both SOE and private corporate borrowers. We believe this reflects BBNI's desire to manage a well-diversified risk profile in its loans portfolio. At the same time, however, BBNI's management is aware that some of its SOE corporate borrowers will issue debt instruments following JSMR's successful issuance of Komodo bonds. As such, we estimate 12.1% yoy loans growth in 2018 with 44.1% exposure to corporate lending.

Expectation of a lower NIM. Given the bank's significant exposure to corporate lending, particularly for the development of infrastructure projects, we expect the assets yield to decline further by 30bps to 7.8% this year. The blended CoF, meanwhile, will improve to 2.9% on the back of a higher proportion of CASA deposits at 65.4% of total customer deposits by the end of the year. All in, we expect fall in NIM by c.20bps to 5.2% in 2018.

More time needed for recovery. The bank's 2.3% gross NPLs ratio at the end of 2017 mostly reflects IDR8.7tn of write-offs. This year, BBNI's management expects a sizeable recovery amount from the write-offs. We take a more conservative stance on this matter, however, noting that some of the bank's borrowers are still going through the legal process at the courts. This suggests that more time is needed before the collateral can be liquidated. With the expectation of 155bps credit costs and IDR5.7tn of net write-offs, the bank's coverage ratio will climb to 145.5%.

Maintain HOLD, new TP of IDR10,400. We maintain our HOLD call on BBNI with a higher GGM-derived TP of IDR10,400 post the FY17 results. We assume 10% CoE, 15.3% sustainable ROAE and 3% long-term growth.

Stefanus Darmagiri (62-21) 29 555 831 stefanus.darmagiri@danareksa.com

Indo Tambangraya (Iтмд IJ)

Focus on organic expansion

Indo Tambangraya Megah (ITMG) managed to increase its reserves organically by 38.9% yoy at the end of 2017 through further exploration and thanks to the impact of higher coal prices. We fine tune our model to incorporate: a) the higher reserves, and b) our higher coal price assumption. Maintain HOLD with a higher TP of IDR33,200 (based on mine-life DCF valuation with WACC of 11.9%). Our target price implies 9.6x 2018F PE.

Focusing on organic expansion to increase reserves and mining life. Given the high coal prices currently, the management indicated that acquisitions would be priced at a premium. As such, ITMG will focus on organic expansion at its current mining area to increase its reserves. Last year, ITMG initiated a three-year exploration program for expansion. In the first year, ITMG managed to increase its reserves by 29mn tonnes (+14.6% yoy). Coupled with the impact of higher coal prices, coal reserves increased by 38.9% yoy to 253mn tonnes (after deducting 2017's production volume). Based on this year's coal production target of 22.5mn tonnes, the mining life of ITMG has increased to 11 years.

Slight recovery in coal production in 2018. After unfavorable weather lowered coal production by 13.8% yoy in 2017, the management indicated a slight recovery in coal production by 1.8% yoy in 2018 while maintaining the average stripping ratio (SR) of around 11x. In 1Q18, however, ITMG is expected to experience a 25% qoq decline in coal production. With pre-stripping activities to increase the SR in 1Q18, which will result in higher costs, we nonetheless believe ITMG's earnings can be sustained in 1Q18 thanks to firm coal prices.

Further strategies for 2018 and beyond. Apart from its focus on organic expansion to increase reserves, ITMG seeks to enhance its margins throughout the value chain. Through its mining services subsidiary, Tambang Raya Usaha Tama (TRUST), the internal overburden removal contribution is expected to be increased to 33 - 35% in the next three years from 12 - 13% currently. Also, with the intention to reduce costs, the company's recent acquisition of fuel procurement firm Gas Emas will help to control ITMG's fuel supply. Going forward, to improve margins further, ITMG plans to build capacity to sell the fuel to third party customers.

Maintain HOLD with a higher target price. As we fine tune our model to incorporate higher reserves and a higher coal price assumption of USD88/tonne for 2018 (from USD78/tonne) and of USD83/tonne for 2019 (from USD75/tonne), we raise our target price to IDR33,200 (based on mine-life DCF valuation with a WACC of 11.9%). Given the limited upside to our target price, we maintain our HOLD call. Our TP implies 9.6x 2018 FPE.

Natalia Sutanto

(62-21) 2955 5888 ext.3508 natalia.sutanto@danareksa.com

Matahari Department Store(LPPF IJ)

Attractive valuation

LPPF's 4Q17 top and bottom line only grew by +4.3% yoy and -1.8% yoy, yet still within our expectation, which has been mainly affected by overall soft purchasing power in 2017 hampered particularly the mid-low segment in Indonesia. As the result, 4Q17 profitability decreased, reflected on lower 4Q17 gross and operating margin due to high rental and salary expense during the year. On the positive note, balance sheet has remained healthy and the current valuation, we think, is too cheap to ignore. BUY!

Weak 4Q17 top and bottom line, as expected. LPPF has booked a weak 4Q17 net profit, IDR402bn (-1.8% yoy, +141.0% qoq), which has translated to an overall poor 2017 net profit, IDR1.9tn (-5.6% yoy). 2017 net profit has achieved 98.9% of our 2017 estimate, still within our expectation. Meanwhile, 4Q17 revenue was only grew by +4.3% yoy despite +36.8% qoq due to seasonality at IDR2.5tn, which has filtered through an overall flattish 2017 revenue at only IDR10tn (+1.3% yoy). This figure however has achieved 101.3% of our 2017 estimate, still within our estimate. This has mainly been affected by overall sluggish purchasing power in 2017 particularly that has hampered the mid-low segment in Indonesia.

Lower 4Q17 profitability. Weak 4Q17 revenue has resulted an overall lower profitability. 4Q17 gross margin fell down to 60.1% (4Q16: 61.5%; 3Q17: 61.7%), weaker compared to last quarter and the previous year. This has resulted to an overall 2017 lower gross margin to 62.5% (2016: 62.8%), yet still within our expectation. Meanwhile, 4Q17 operating margin decreased to 21.3% (4Q16: 21.4%; 3Q17: 11.6%), which has translated to an overall weaker 2017 operating margin at 24.0% (2016: 25.5%), still within our estimate. We expect that this has been mainly due to higher 1) rental and 2) salary expense. Hence, overall 2017 operating profit was down by -6.9% yoy in 2017.

Balance sheet has remained healthy. On the positive note, LPPF's balance sheet has remained healthy with continued strong net cash position. Meanwhile, the management as well has successfully slightly lower the overall 2017 inventory days to 97 days (2016: 99 days; 2015: 107 days), which we notice the trend has keep trending down since 2015. This has mainly reflected the management's effort to continue focus on improving inventory management, despite unfavorable macro in the previous year.

Too cheap to ignore, BUY at unchanged TP IDR12,500. The stock price has fallen deep since early this year and the current valuation, we think, is too cheap to ignore at only around 15.9x P/E 2018F, which is about -2 std based on 5 years historical. We maintain our BUY recommendation at unchanged TP IDR12,500, based on 17.6x P/E 2018, slightly lower than -1 std based on 5 years historical. Risk to our call include lower than expected purchasing power and higher inflation in 2018.

SECTOR

Oil and gas: Pertamina to be cautious in taking over terminated blocks

The government expects Pertamina to be cautious in selecting oil and gas blocks. If the blocks are old and it is difficult for the oil or gas to be extracted, Pertamina will book losses. Pertamina is currently in the process of acquiring eight terminated blocks in 2018, namely: Tuban, Ogan Komering, Southeast Sumatera, tengah, Sanga-sanga, North Sumatera Offshore, East Kalimantan, and Attaka. Furthermore, the Special Task Force for Upstream Oil and Gas Business Activities (SKK Migas) expects Pertamina to reduce its operational expenses. The cost recovery of Pertamina is still deemed to be high due to its extensive operational coverage across Indonesia. To reduce costs, Pertamina may seek to cooperate with partners. SKK Migas has also asked Pertamina to reduce drilling time to minimize the costs without neglecting safety. (Bisnis Indonesia)

CORPORATE

Agung Podomoro Land to develop Taruma City

Agung Podomoro Land (APLN) plans to develop a new township in Karawang named Taruma City. Located on 5.6ha of land bank, the project is located next to Grand Taruma. The launching will be conducted in mid-2018. In the first phase, APLN will launch 243 shop houses with prices of IDR2-10bn/unit. The company sells landed residential land plots at a price of IDR8mn/sqm. (Bisnis Indonesia)

Arwarna Citramulia to expand its export markets

Arwana Citramulia (ARNA) plans to expand its export markets to Pakistan. ARNA currently exports its products to Brunei Darussalam, the Philippines, the Maldives, and Malaysia. Presently, sales to export markets only contribute 5% of ARNA's total sales. This year, ARNA expects to record 56mn sqm of sales (higher than sales in 2017 of 52mn sqm). This should translate into IDR1.9tn of revenues and IDR150bn of net profits. The company also plans to add a new production line in Plant VI Palembang with additional capacity of 6mn sqm. Construction of this new plant will begin in 2019 and be completed by the end of 2019. The company has also allocated capex of IDR50bn to purchase new digital printing machinery. (Investor Daily)
